

VIKRAM GANESH KUMAR

West Lafayette, IN | (615) 955-4375 | vganeshk@purdue.edu | linkedin.com/in/vikram-ganesh-kumar

EDUCATION

Purdue University

Bachelor of Science in Computer Engineering

- Dean's List & Semester Honors

West Lafayette, IN

Expected May 2028

PROFESSIONAL EXPERIENCE

Computational Quantum Electromagnetics Lab

Research Intern – Dr. Roth's Team

West Lafayette, IN

January 2026 – June 2026

- Reduced experiment turnaround time by building a Python-based virtual microwave circuit solver simulator that eliminated the need for physical lab setups, enabling the research team to test hypotheses faster.
- Improved research communication across a 4-person team by producing structured technical reports that translated complex electromagnetic data into clear, actionable summaries for faculty decision-making.
- Presented research findings at the Purdue Undergraduate Research Symposium, delivering a formal presentation and receiving evaluator feedback in a competitive, judged academic setting.

Purdue University School of Materials Engineering

Undergraduate Research Assistant

West Lafayette, IN

May 2025 – August 2025

- Improved MXene colloidal stability by identifying optimal synthesis conditions through systematic variation of reaction time and temperature across 10+ experimental trials.
- Informed lab protocol adjustments by generating quantifiable degradation data from MXene samples analyzed weekly over a multi-week period using UV-Vis-NIR spectroscopy.

EPICS Team – Miller Elementary School

Software Developer

West Lafayette, IN

January 2025 – June 2025

- Launched a fully functional parent pick-up management app for Miller Elementary School on time by leading a 5-person cross-functional team through requirements gathering, development, and prototype delivery within a single semester.
- Validated app usability with ~20 Miller Elementary parents through a live demo and training session, gathering real-world feedback that confirmed the app reduced pick-up process ambiguity for both staff and parents.
- Ensured on-schedule delivery for Miller Elementary by redistributing tasks across teammates during high-workload periods, enabling the team to conduct parent onboarding sessions before the semester deadline.

LEADERSHIP & COMMUNITY IMPACT

Ophelia – Non-Profit Organization

Head of Technology

Hyderabad, India

December 2023 – January 2025

- Expanded Ophelia's donor reach and digital presence by directing a 20+ member student volunteer team to design, build, and launch a full-stack donation and impact-reporting website from the ground up.
- Generated \$2,000 in donations for specially-abled community programs across Hyderabad by building and launching a user-facing donation platform that communicated the organization's impact clearly to potential donors.
- Enabled Ophelia's 30+ volunteers to amplify advocacy for an underserved community by coordinating design, development, and content teams to deliver the platform on time and within scope.

PROJECTS

3-Band Analog Audio Equalizer

November 2025 – December 2025

- Delivered a fully functional 3-band analog audio equalizer by independently owning the project from schematic design through physical circuit construction, applying core concepts in signal processing and resistance tuning.

SKILLS & INTERESTS

Technical Skills: Python, C/C++, JavaScript, Git, MATLAB

Awards: Dean's List, Semester Honors – Purdue University

Interests: Embedded Systems, Open-Source Software, Competitive Programming
